VIRUS

+ Description

The disposable black nitrile gloves, SWS-DISP5001, have excellent adaptability to the user's hand and are very comfortable. These gloves can be used for work in food production facilities and with animals. Due to their weight, they provide the wearer with excellent sensitivity while offering excellent resistance. Powder-free gloves, to mitigate the risk of allergic reactions, ambidextrous, non-sterile, single-use, waterproof and airtight. They are certified to EN ISO 374-1:2016+A1:2018/Type C (gloves resistant to chemical products), EN ISO 374-5:2016 (gloves resistant to micro-organisms and viruses) and 1935/2004 (risks associated with contact with food).

+ Activity Sectors

Restaurant and Catering

DIY & Crafts

Chemical Processes and Preparations

Environments with Bacteria, Moulds and Viruses Present

Disposable Nitrile Gloves

SWS-DISP5001

+ Maintenance

These gloves are for single use only. After use, replacement is recommended. When worn, the gloves may provide less resistance to chemical products due to changes in their properties, movement, friction, degradation caused by chemical contact, etc., which can significantly reduce the wearing time. The expiry date is indicated on the glove box and may change if the gloves are stored improperly. Store the packaging in a cool, dry place away from sunlight (see the instructions on the box). We recommend that you keep the gloves in their box until you use them. Check the product before and during use; if you see any damage, the product should be replaced.

+ Pictogram Explanation

	EN374-1 certified gloves		Powder-free gloves
	EN374-5 certified gloves		Gloves resistant to some chemicals and/or solvents
	Gloves certified for food contact		Gloves resistant to micro-organisms and/or viruses
