GAMA HEAD-PROTECT

+ Features

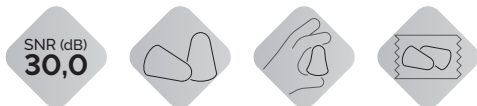

Material Polyurethane foam

Colors  Red | Red

Certifications  EN 352-2:2002

SNR (dB) 30,0

Sizes Unique

+ Description

The SWS-EAR1503 earplugs have been developed for general use in industry, primarily to protect the wearer from medium-level industrial noise and prevent any injuries that may result. Their polyurethane foam construction means that they mould perfectly to each ear, providing greater soundproofing while being more comfortable for the wearer.

+ Activity Sectors

General Use

Construction

Building Sites

Light Industry

Agriculture and Gardening

Forest and Paper Industry

Locksmiths

DIY & Crafts

+ Maintenance

Clean after each use to extend its lifespan. Sanitize the hearing protectors using a damp cloth with a little neutral detergent. In case of deeper cleaning, use running water and neutral cleaning liquids and dry with a soft cloth, never drying in the sun. Do not use paints, solvents, chemicals, adhesives, fuels or similar substances on these earmuffs. Its resistance and other protective properties can be compromised by these substances. The loss of these protective properties may not be apparent or readily detectable by the user.
